(54) LIGHT-EMITTING ELEMENT

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a light-emitting element, having superior radiation luminance and luminous efficiency and capable of reduction in production costs and enlargement of area.

SOLUTION: This light-emitting element is provided with a base material, a transparent electrode made of a metal thin layer, an organic compound layer, and a back electrode. The organic compound layer contains at least a hole injection layer and a light-emitting layer.
